

## Geo-Logic ASSOCIATES

Mr. Sarantopoulos' 23 years of experience includes civil design, construction surveying, water resources engineering, civil and computer aided engineering and design, and land development for residential and commercial projects. He has experience designing roads, water, wastewater and stormwater improvements for public works and private sector projects including design for landfills and open pit mines. His water engineering experience includes wastewater discharge analysis and water treatment system design.

Steve has held several management positions where he was responsible for managing staff engineers and surveying teams. He has also managed large project teams. He has been the resident engineer for public works projects and has on-site construction experience and has owned his own consulting firm.
